

# SPECIAL SEMINAR

共催：医学セミナー 第67回 免疫学セミナー

## NK CELL REGULATION BY IMMUNE CELL RECEPTORS

**Fri. February 12**  
**17:00-18:30**

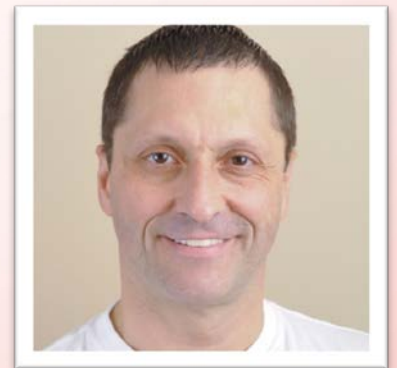

Room 411 in Medical Gakugun-to 4A Bldg.

医学学群棟 4A 411

Guest Speaker

**Dr. André Veillette**

Professor, Molecular Oncology research unit  
Institut de recherches cliniques de Montréal

**Abstract:** NK cell functions are regulated by multiple activating and inhibitory receptors. Dr. Veillette will present recent findings on the role and mechanism of action of SLAM family receptors and DNAM-1 in NK cell activation and education.

This seminar is hosted by:

**Ph.D. Program in Human Biology**

School of Interactive and Global Majors (SIGMA)
